

HALion Macro Page Home

In this section of the documentation, you find additional information about Macro Page editing and a reference to all objects like [resources](#), [controls](#), and [templates](#) used on HALion macro pages.

To learn more about how to build macro pages and templates and how to use the Macro Page Editor please refer to the [Steinberg.help](#) documentation. To find examples for the usage of templates, read the section [Exploring Templates](#) .
