

Lua Syntax Highlighting

The following pseudo code exemplifies the Lua syntax highlighting used throughout this documentation.

```
--single line comment

--[[
    block comment
--]]

--keywords
and      break    do          else        elseif     end
false    for       function    goto        if         in
local    nil       not        or          repeat     return
then     true      until      while

--strings
a = 'alo\n123''
a = "alo\n123\""
a = '\97lo\10\04923''
a = [[alo
123]]
a = [=[
alo
123"]=]

--numbers
3      3.0      3.1416      314.16e-2      0.31416E1
0xff   0x0.1E  0xA23p-4    0X1.921FB54442D18P+1

--functions
print(a)
print("Hello")
print(123)

for k,v in ipairs(t)
    print(v)
end
```

Keywords, strings and numbers extracted from [Lua's Reference Manual, Chapter 3 - The Language](#).
